# What is TPE?

Thermoplastic Elastomers (TPE) can be processed in all the plastic extrusion and injections lines. They don't need to be vulcanized.

## General Properties;

Low Density

Wide Range of Hardness

Good Resistance to UV & Ozone

Working in Wide Temperature Range

100% Recyclable

Low Compression Set.

## CNT Luggage Gaskets

TPE Based Gaskets ◀

### Advantages;

**It is healthy;** friendly to human and environmental health, does not contain carcinogen.

**It is 100% recyclable,** does not pollute nature.

**Can be produced in desired color.**

It does not leave you halfway due to its **high UV & ozone resistance** so it can withstand harsh weather conditions.

Maintains dimensional stability in hot or cold which means suitable

**It is clean;** The oil will not spill, it will not pollute.

**Non-combustibility can be achieved;** Test results according to DIN 4102-01 standard can be submitted.

Can be produced **Co-ex or tri-ex.**

Compliant with European Standards - **ROSH, PAH, REACH and RAL.**
