

**GASKET  
APPROVED BY  
THE SECTOR  
LEADERS**

# WHY TPE?

**Colorful:**  
Available in wide range of colors and tones.

**Durability:**  
High UV-Ozone resistance long lifetime.

**100% recyclable and environmentally friendly.**

**Co-Extrusion:**  
Gasket section can be filled with different raw materials for desired performance.

**Excellent compression set value:**  
No aging and plastic deformation during working cycles.

**Broad working temperature:**  
Works perfectly between -40°C and +70°C

**Oil-lubricant free:**  
No oil-lubricant migration problem.

**Rosh, Pah and REACH proved.**

**Soundproof:**  
Rubber phase of TPE raw material absorbs all vibrations and eliminates noises.

**Flame proofed:**  
Complies with DIN 4102-01 standards.

# What are the advantages?

+ Colorful

+ Product for life

+ Noise and vibration reduction

+ Prevents piping fatigue failures due to vibration and stress

+ No environmental damage

+ Easy installation and solid performance  
(Refers to 236/255 patented product)
