

Global TPE Sealing Solutions

About Us

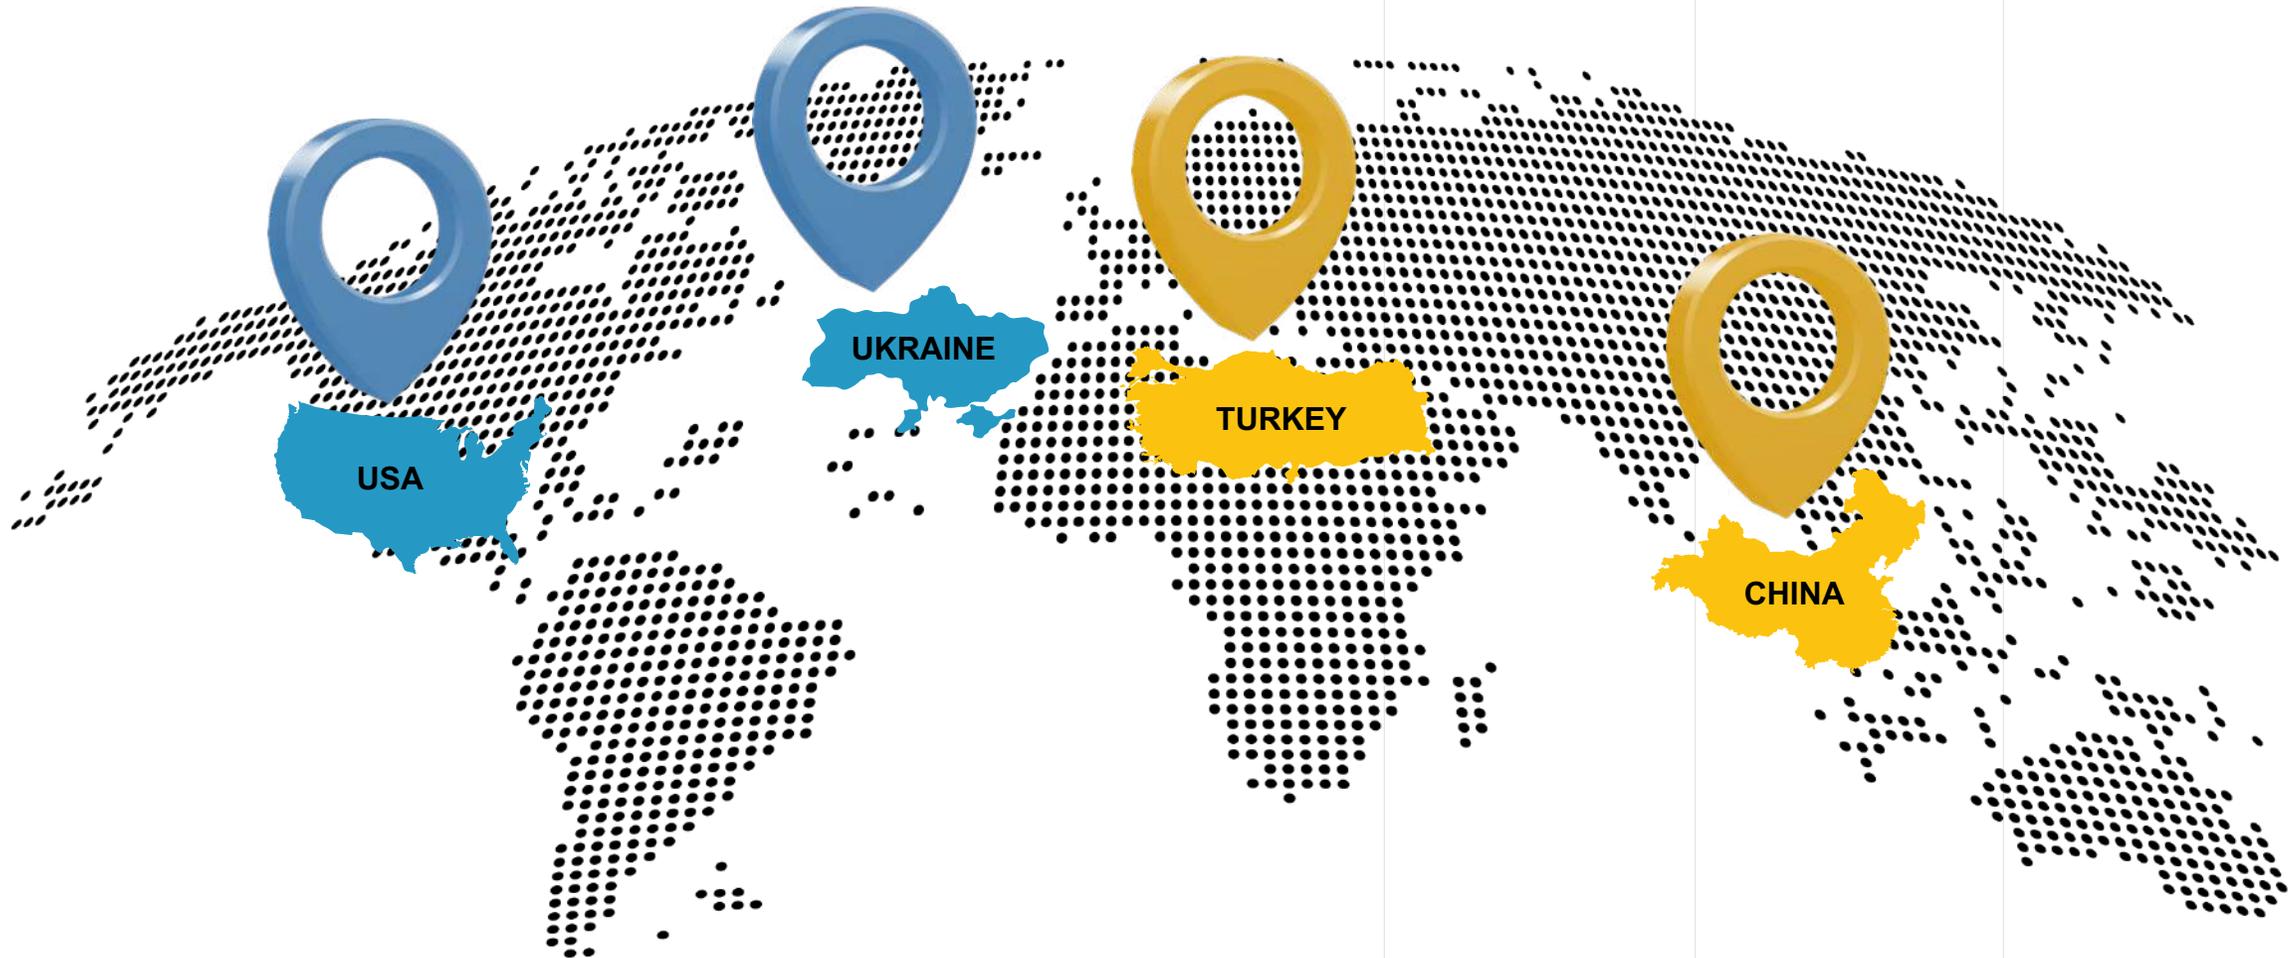

CNTConta was founded in **Gebze, Turkey**, in 2004 and started to manufacture custom TPE-based (Thermoplastic Elastomer) gaskets for the PVC window industry.

Our Locations

Production Facility
Turkey - China

Office / Warehouse
USA - Ukraine

Our Companies

Our Overseas Companies

Ningbo Conta Sealing Products Co Ltd. – est. 2014
Production: Thermoplastic Elastomer - based (TPE)
Custom Extrusion Profiles

Conta North America Inc. – est. 2014
Sales Office: Thermoplastic Elastomer - based (TPE)
Custom Extrusion Profiles

Our Affiliated Companies

Pulver Kimya
1988 Powder Coating Manufacturer

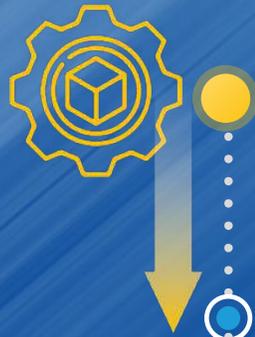

Pulron
2013 Thermoplastic Powder Coating Manufacturer

Powcoat
2018 Veneer Powder Coating Manufacturer

Milestones

2004
Started Custom TPE Profile Extrusion production.

2005
Build our in-house tooling department.

2006
Changed our name to CNTConta Elastik Ürünler San. Ve Tic. A.S.

2006
Made our first export to Bulgaria.

2006
We began to serve the white goods industry.

2008
Decided to make investments in the refrigerator industry.

2010
Moved to our modern facilities in Gebze.

2010
Started to make sales to the refrigerator industry.

2013
Began to work with PVC profile manufacturers in China.

2013
Decided to start manufacturing also in China.

2016
Made the first gasket sales to the trailer body, pipe clamp, toolbox industries.

2014
Began our manufacturing journey under the name of "Ningbo Conta Sealing Products Co Ltd." in Ningbo, China.

2014
Created a joint venture with a local manufacturer in Michigan, USA. under the name of "Conta North America Inc."

2017
Acquired shares of our American partners to become the sole owner of Conta North America Inc.

2018
Moved Conta North America from Michigan to Gainesville, Georgia.

2019
Moved to our new and modern plant in Gebze Organized Industrial Zone, Tembelova.

2021
Switched to the SAP system, one of the best ERP systems worldwide.

Headquarters Production Facility in Turkey

45.000 m²
Area

36.814 m²
Indoor Space

Annual Production
Capacity
350 Million Meters

Gebze Organized Industrial Zone
Gebze, Kocaeli | Turkey

Production Facility in China

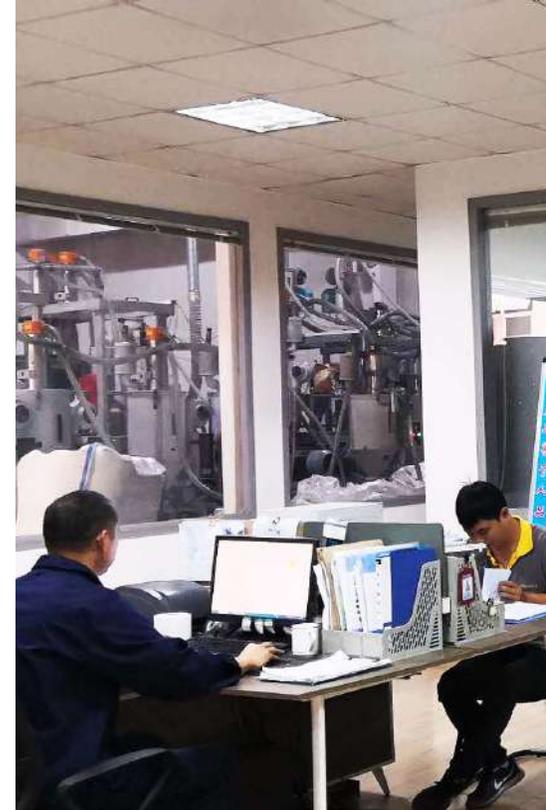

2.500 m²
Indoor Space

Annual Production
Capacity
50 Million Meters

Xiaogang, Beliun District Ningbo | Çin

Warehouse in the US

21500 ft²
Storage Area

***300 tons of goods are
dispatched from our
warehouse annually.***

Gainesville, Georgia | USA

Warehouse in the Ukraine

750 m²
Storage Area

150 tons of goods are dispatched from our warehouse annually.

Kiev | UKRAYNA

R&D Department

Our design team designs the gaskets according to our customers' needs.

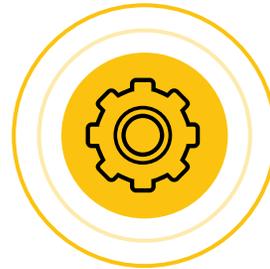

The design team draws two- and three-dimensional sketches of gaskets with Solidworks and Autocad programs in line with the information received from the customer.

To date, we applied for patents to 24 of our products which were manufactured at our facilities.

2012

A joint study with TÜBİTAK has started.

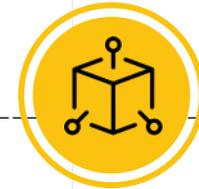

2013

Initiated our innovative TPE Gasket Development Project to deliver energy-saving solutions for commercial Refrigerators.

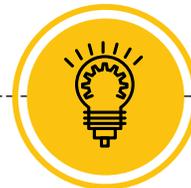

2017

Received 1501 R&D Industry Collaboration Program Grant support for our Expansion Joint Development Project.

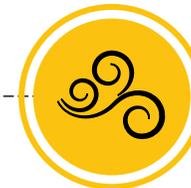

2018

Made an application for the mold modeling project where materials with different viscosity will be released from the mold at the same flow speed.

2021

A new method of gasket production is adopted.

2021

Deployed a new kind of enduring gasket to provide airtight, soundproof, steamtight and waterproof sealing.

2019

Made a project application to create a production method to build a non-linear structure in the extrusion process.

Quality Control

All of our lines are PLC-controlled.
Production in DIN ISO 3302-1 / E1
tolerances.

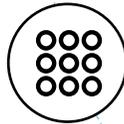

Samples from all
measured products are
kept for about one year.

The measurement
process is carried out
within the specified
tolerance range.

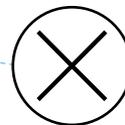

All measurements
are documented.

Measurement results
are transferred to the
integrated SAP system.

Non-conforming products
are rejected.

CNT PVC Door & Window System Gaskets

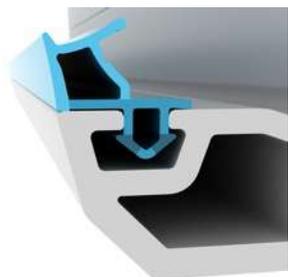

GLASS BEAD GASKET

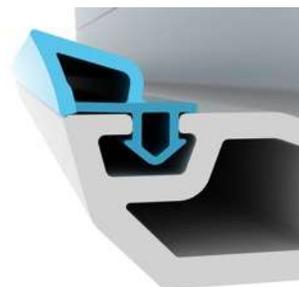

SASH GASKET

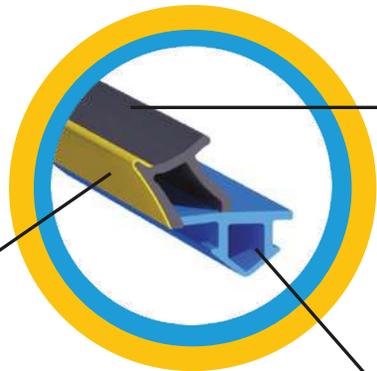

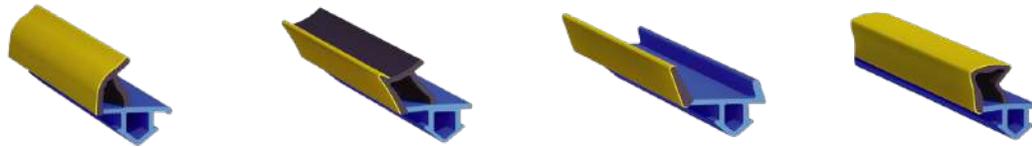

FRAME GASKET

UNIVERSAL GASKET

CNT Slipcoat

Softer Durometer Upper Part

Low Permanent Deformation with a Perfect Sealing.

Slip Coat Surface

Aesthetic Appearance.
Slippery Surface to reduce drag.
Perfect UV and Heat Resistance.
Perfect Wear Resistance.

Harder Durometer Rigid Part

No Shrinking in the profile after insertion.
Don't come out of the profile.
Automatic In-line Insertion is possible.
